

ANBUHELVAN GANESAN

Ph. +91 8939017440 | anbuchelvanganesan.cse2024@citchennai.net | Chennai, Tamil Nadu
Linkedin: [Anbuchelvan Ganesan](#) | GitHub: github.com/Anbu-00001

OBJECTIVE

Computer Science student who designs and ships end-to-end software across full-stack web and applied ML/MLOps, and develops mobile applications. I turn complex ideas into practical, reliable products — from award-winning agentic AI to production-grade MLOps — with several projects deployed live on Hugging Face Spaces, GitLab, and Lovable. Committed to FOSS and continuous learning.

EDUCATION

B.E. Computer Science Engineering — Chennai Institute of Technology (2024–2028) CGPA: 8.0 (up to 3rd Sem)
Alwin Memorial Public School — Higher Secondary: 75% | High School: 87%

EXPERIENCE

Testing & Deployment Intern — Arbitrix Technologies May 1 – June 15, 2026 | Stipend: ₹7,500
Supported software testing and deployment workflows for client web projects, helping validate releases and ship changes to production.

Frontend Developer — workcommunity.net July 12, 2026
Built and deployed the production frontend (React/Next.js) for an early-stage startup building AI agents and custom ERP software for manufacturing, logistics, and enterprise clients — independently handled domain acquisition (GoDaddy) and production deployment (Vercel).

CERTIFICATIONS & COURSEWORK

Goethe-Institut German: A1 (73%), A2 (69%) · **AWS:** Cloud Practitioner Essentials, Technical Essentials, Machine Learning & AI
NPTEL: Introduction to IoT (82%), Data Analytics with Python (64%) · **Eduskills:** Google AI-ML Virtual Internship, AWS IoT Cloud Engineer, MongoDB Basics

PROJECTS

CivicMesh — Multi-agent AI navigator (Jaseci / Jac): A graph-native multi-agent system that turns a single sentence in any language into a ranked, eligibility-checked action plan connecting people in crisis to housing, food, healthcare, and legal aid. Features multi-hop graph pathfinding, Bayesian outcome-learning eligibility, and a Reflexion-style self-reflection loop. Winner — Agentic AI Track, JacHacks Spring 2026. Deployed live on Hugging Face Spaces: huggingface.co/spaces/Anbu-00001/CivicMesh

Sentinel-AIOps — Production-grade MLOps system (Python + LightGBM): An end-to-end system that classifies GitHub Actions CI/CD failures in real time from HMAC-verified webhooks, using a LightGBM multiclass model (Macro F1 = 0.90) over an 884-feature matrix. Includes Population Stability Index (PSI) drift monitoring, a human-in-the-loop feedback loop, a live observability dashboard, and Prometheus metrics. Deployed live on Hugging Face Spaces: huggingface.co/spaces/Anbu-00001/Sentinel

Faultline-Engine — Deterministic CI merge gate (Rust + Go): A GitLab CI merge gate built on GitLab Orbit that blocks the untested “blast radius” of a code change and prescribes the single smallest test to close the gap. 110 deterministic tests; fired on 21 of 32 real BugsInPy regressions; polyglot across Go, Python, and Ruby; companion agent published in the GitLab AI Catalog. Live interactive change-impact graph: ripple-deep-demo-67d078.gitlab.io

DeepTrust — Full-stack media verification (React + TypeScript + Supabase): A full-stack web app that assesses the authenticity of images, video, and audio across multiple evidence streams, returning a calibrated, explainable trust verdict with attention heatmaps and anomaly timelines. React + Tailwind frontend on a Supabase + Edge Functions backend; rapidly built and deployed through prompt-driven development on Lovable. Live: deeptrust-verificationsystem.lovable.app

SKILLS

Languages: Python, TypeScript, JavaScript, Dart, Go, Rust, C++, Jac
Web & Full-Stack: React, Next.js, Node.js, REST APIs, FastAPI, HTML, CSS, Tailwind **Mobile:** Flutter (Android), Kotlin
ML & Data: Machine Learning, MLOps, RAG, Data Analytics, Streamlit **Databases:** SQL, PostgreSQL, Supabase, MongoDB (basics), SQLite
DevOps & Tools: Git/GitHub, GitLab CI/CD, Docker, Linux (shell scripting), AWS (EC2, S3, IAM), Claude Code
Core CS: Data Structures & Algorithms, DBMS, OOP, Operating Systems, Computer Architecture, Probability & Statistics
Networking: TCP/IP, HTTP, DNS, Client–Server

ACHIEVEMENTS

JacHacks Spring 2026 (International Hackathon) — Winner, Agentic AI Track (\$600 USD ≈ ₹56,000) — awarded for CivicMesh, a multi-agent civic-aid navigator.

RVSCE SheSafe Build-A-thon — Second Runner-Up (₹5,000).
